WORK EXPEARIENCE:

Date Employed	Job Title	Company
08/2010 – Current (temp work)	Digital Cartographer	CA Design

Currently working as a digital cartographer for CA Design services. Creating GIS(Geographical Information Systems) of Satellite images for the Ministry of Defence.

Within my role I demonstrate detailed, logical approaches to investigating satellite imagery to be used for GIS.

01/2010 - 08/2010

Web Designer / Front-
end Developer

NorfolkBroads.com

Working as a Front End Web designer/developer at norfolkbroads.com / innershed.com.

Gained experience working within a web development environment, working within a team and on solo projects. I gained experience within the whole project life cycle from initial concept to testing and debugging.

Utilising a custom built PHP framework to develop our clients websites and integrating content management systems.

I liaised with clients on a daily basis to find out their needs and support them with problems such as emails, and general desktop support when needed.

I have also been involved in the development of SEO services which we offer to our clients such as setting up blogs and keyword research.

7/2008 - Current

Web Designer

Sevanstudios

Self-employed as a freelance web designer. Gained experience communicating with clients finding out their needs and implementing a website to cater for their business and exceeding their expectations.

6/2007 – 9-2007

Retail Assistant

Tesco/Caister/Norfolk

Working on the delicatessen counter, dealing with customers, staff working in a team to provide a good service.

6/2004 – 12/2006

Retail Assistant

*Matalan/Great
Yarmouth/Norfolk*

Gained experience working with computerised tills, cash handling, customer care and stock replenishment. My Duties were to serve customers in the home department and unload stock deliveries also to replenish stock on shelves.

6/2002 – 6/2002

*ICT Department
Assistant*

*Great Yarmouth Borough
Council*

I assisted within the day to day operation of the Main computer Servers also to assist Technical Support Offices with movement and fault finding, both software and hardware, on Desktop equipment.
